## SKILLS

- Ruby, JavaScript
- Rails, Sinatra, jQuery, Handlebars
- PostgreSQL, MySQL, SQLite
- HTML5, CSS3, Bootstrap, Skeleton
- Rspec, Jasmine, Capybara, SimpleCov
- Git, GitHub, BitBucket
- Heroku, CircleCI
- Agile, Kanban, TDD, OOD/OOP, MVC, REST, AJAX
- Experienced instructor

## Summary

A full stack developer with prior training in business and math. An entrepreneur and technologist at heart, I enjoy solving complex problems, building practical things, and developing new businesses. I develop with Ruby, Rails, Sinatra, JavaScript, SQL, or whatever other tool is required for the task. I utilize TDD, follow Agile methods, and work continuously to expand my skill set and learn new technologies.

## Projects

**311 by the Hour** (Developer) ([https://github.com/dcr8898/311\\_by\\_the\\_hour](https://github.com/dcr8898/311_by_the_hour))

- A stunning example of big data visualization: explores 13M+ rows of NYC 311 call data by complaint type and hour of day when calls were placed.
- Written in JavaScript, drawing data from NYC Open Data resources and using the Highcharts charting library. [http://dcr8898.github.io/311\\_by\\_the\\_hour](http://dcr8898.github.io/311_by_the_hour).

**eDiscoveryPM.com** (Developer) (<https://www.ediscoverypm.com>)

- From-scratch development of showcase web site for private client, an author.
- Designed to promote the client's book and provide a hub for resources relating to his professional practice area: Project Management in Electronic Discovery.
- Built with WordPress using a customized, responsive theme.

**There's A Board** (Co-Developer) (<https://github.com/theresaboard>)

- Productivity app to manage and encourage peer-to-peer mentorship at an immersive coding school, includes features to manage paid teaching assistants.
- Built on a Rails API (with full test coverage) and a custom JavaScript front end.
- Demo site available at <http://mentor-me-dev.herokuapp.com>.

More projects are listed at <https://github.com/dcr8898>.
